CREATE CALM, HEALTHY AND ELEGANT SPACES

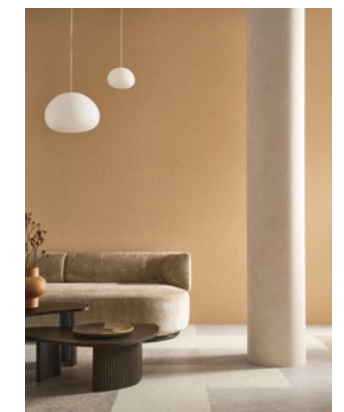

Heavy-duty vinyl wallcovering Madikeri

PRODUCTS THAT CREATE ATMOSPHERE AND COMFORT

In an environment dominated by noise and interference, imagine a space where silence becomes a controlled and valued resource. A place designed to ensure **discretion**, where every conversation is protected and every moment preserved in an atmosphere of optimal **confidentiality**.

Our acoustic solutions are not mere materials: they are allies of well-being, comfort, and conviviality. They dress your walls in **subtle** elegance, softening echoes and creating that precious bubble where one breathes easier and thinks more clearly.

From bedrooms to lounges, corridors, and common areas, your spaces become conducive to rest, social interaction, and discreet exchanges.

ENHANCE ACOUSTIC COMFORT

Dans un hôtel, l'expérience client ne se résume pas à un lit confortable ou à une décoration raffinée. Elle repose aussi sur ce que l'on ne voit pas, mais que l'on ressent immédiatement : **le calme, la quiétude, la maîtrise de l'environnement sonore.**

Nos revêtements muraux acoustiques ont été conçus pour répondre aux exigences spécifiques de l'hôtellerie :

- **Réduction significative des échos au sein des chambres, dans les couloirs ou les espaces communs.**
- **Amélioration de l'intelligibilité des échanges dans les zones de restauration, de réception ou de coworking.**
- **Absorption des réverbérations pour une atmosphère douce, confortable et apaisante.**

Grâce à leurs propriétés acoustiques performantes, nos solutions permettent de préserver la confidentialité des échanges dans les chambres, **d'adoucir les ambiances sonores** dans les espaces de vie et les couloirs, et de créer des environnements **à la fois feutrés et conviviaux.**

Vos clients profitent pleinement de leur séjour, dans **un confort sonore optimal**, propice au repos, à la concentration ou à l'échange.

ENHANCE ACOUSTIC COMFORT, BOOST WELL-BEING

3D Acoustic Wallcovering, Polyform EOS Allure

ACOUSTIC COMFORT, CONTROLLED FROM WALL TO CEILING

Compact felt acoustic wall panel, SlimBox Design

TECHNOLOGY SERVING DESIGN

Texdecor offers a wide range of products to meet all your specifications:

- Textile or compact felt acoustic panels
- Acoustic wallcoverings
- Compact felt acoustic coverings for walls and ceilings
- Decorative vinyl wall coverings for heavy-duty use

High-performance acoustic correction

Our solutions significantly reduce reverberation and noise, with absorption coefficients up to $\alpha_w 1$, depending on the model. Ideal for guest rooms, corridors, lounge areas, or dining spaces.

Preserved comfort and privacy

They create a **soft, confidential** atmosphere, conducive to rest and discretion expected in a hotel setting. Your guests enjoy a calm sound environment, free from disturbances.

Easy integration and custom aesthetics

Available in a wide range of textures, colors, and formats, our coverings blend seamlessly with any interior, from boutique hotels to luxury complexes.

Depending on the available surfaces wall or ceiling and the desired acoustic correction, select your solution from our range of complementary product families.

DURABLE AND TIMELESS PRODUCTS

Texdecor has been designing acoustic solutions for over 50 years and is a recognized specialist in decorative and sound-absorbing wall surfaces in a single application. Our product ranges are complementary, offering solutions for all your needs.

Durability and longevity

Made from technical materials, our coverings resist impacts, scratches, and wear. They maintain their appearance and acoustic performance even in high-traffic areas.

Compliance with hotel and public building standards

Meeting **fire reaction regulations** for public-access buildings, Texdecor products provide reassuring safety for your guests and your establishment.

Eco-responsible design

Some models incorporate recycled or recyclable materials, promoting a more sustainable and responsible approach without compromising performance or functionality.

**WALL COVERINGS,
DESIGNED TO LAST,
CREATED TO BECOME**

Polyform Vinacoustic Roma

ACT FOR BETTER INDOOR AIR QUALITY

While green spaces help improve air quality, wall coverings and acoustic panels also play a key role in **ensuring better indoor air**.

100% of our decorative and acoustic vinyl coverings are **phthalate-free** and **emit very low levels of VOC**. The VINACOUSTIC acoustic vinyl range emits 20 times less than the A+ threshold, and its microperforations, designed to absorb sound frequencies, also allow the wall to “breathe.”

Vinyl surfaces are very **easy to maintain and washable**. The textile covers of acoustic **panels are removable for periodic cleaning**. Compact felt surfaces can be vacuumed and washed. Our products are designed for easy maintenance, ensuring both long-lasting durability and **clean, healthy spaces**.

WHAT ARE PHTHALATES

Phthalates are plasticizers used to make vinyl films flexible for wall coverings. Although permitted by regulations, they have been banned in childcare products since 1999 and have been under health impact studies for several years. Given the debate, Texdecor chose to remove them from its products in 2018. While not legally required, this ensures the healthiest possible formulation.

INNOVATIVE PRODUCTS DESIGNED FOR BOTH NEW CONSTRUCTION AND RENOVATION

Texdecor's extensive range offers solutions tailored to every use, acoustic requirement, ambiance, space design, and budget. Available in vinyl, textile, or compact felt, our wall and ceiling products come in various thicknesses, from 4 mm to 5 cm, effectively absorbing reverberation and creating a calmer, more welcoming environment.

AN EXCLUSIVE TEXDECOR TECHNICAL DESIGN

The VINACOUSTIC Collection: an eco-designed, heavy-duty acoustic wall covering

Decorative Surface

Highly durable compact PVC, mass-colored, phthalate-free
Textured, printed, and micro-perforated to ensure the acoustic porosity of the decorative surface

Underlay

Micro-perforated PVC foam to enhance acoustic absorption
Tinted PVC to make the joint invisible, phthalate-free

Acoustic backing

Layer of non-woven PES acoustic material, 90% recycled

ECO-DESIGNED PRODUCTS TO HELP ACHIEVE BUILDING DECARBONIZATION GOALS

Several development initiatives have been implemented by the Texdecor product team to reduce the carbon footprint of its collections. Examples include:

- **Reduced logistical impact** : 80% of collections sourced and **produced in France**.
- **Environmental management of production** : ISO 14001 certification for acoustic vinyl wallcoverings.
- **Use of recycled content**: 26% in acoustic vinyl coverings, 60% in acoustic panels.
- **Carbon impact measurement** : assessed via LCA methodology and EPDs (Environmental Product Declarations).
