WALLCOVERING

ACOUSTIC WALLCOVERING

ACOUSTIC WALLCOVERING

This range includes wallcoverings that combine acoustic comfort, decorative style and ease of installation.

Their acoustic performances of α_w / NRC 0.15 to 0.3, enable them to effectively treat resonance problems commonly encountered in different types of public buildings. These wallcoverings comply both the acoustic regulations in force in new buildings and the voluntary measures to improve the comfort and functionality of renovated buildings.

The design meets the requirements of buildings with high footfall: durable and easy to maintain. Different finishes and complementary decors are available to adapt to the type of use, the ambiance and the budget of each project.

4 quality levels are available :

Textile - α_w / NRC 0.3 | Vinyl-coated flock - α_w / NRC 0.25 | Paintable - α_w 0.25 / NRC 0.2 | Vinyl foam - α_w /NRC 0.15

ACOUSTIC PANEL

The AirPanel acoustic panels are made of a 5 cm thick and a metal frame, covered with a transonic fabric. Their excellent acoustic properties effectively correct any reverberation phenomena, therefore providing functionality and comfort in the room.

Available in 15 formats, which can be suspended from the ceiling or fixed to the wall, they adapt easily to any type of configuration. Depending on the combinations of colours and shapes, the acoustic solution can be discreet or set the style for the room.

Print'AirPanel can also be digitally printed with your own images, allowing total decorative freedom for your project. Create your own combination using your images with our large selection of panel formats. Create a jigsaw from your image by using identical or different formats in a mosaic style.

Texdecor, creator of acoustic decorative solutions for your comfort

ACOUSTIC 0.3 RANGE

This range includes wallcoverings that combine acoustic comfort, decorative style and ease of installation. Their acoustic performances of α_w / NRC 0.15 to 0.3, enable them to effectively treat resonance problems commonly encountered in different types of public buildings. These wallcoverings comply both the acoustic regulations in force in new buildings and the voluntary measures to improve the comfort and functionality of renovated buildings. The design meets the requirements of buildings with high footfall: durable and easy to maintain. Different finishes and complementary decors are available to adapt to the type of use, the ambiance and the budget of each project.

ACOUSTIC 0.7 RANGE

In addition to the range of ACOUSTIC 0.3 wallcoverings, the ACOUSTIC 0.7 range offers a broad range of superior acoustic performance: thick α_w / NRC 0.55 wallcoverings, α_w / NRC 1 acoustic panels, α_w / NRC 0.65 acoustic blinds. These 3 types of products deal effectively with acoustic problems while adapting to the architecture of the building and the surfaces available. A large choice of colours available in a simple textile decor means you can easily match them in the same area : on the wall, in front of the window or suspended from the ceiling. Depending on the combinations of products and shapes, the acoustic solution can be discreet or set the style for the room.
